

Mag O₇

The Ultimate Oxygenating Digestive System Cleanser

- Average Serving Size: 3 - 5 Caps
- Servings per container: Aprx 40
- Ask about our 10 Day Cleanse Program

IMPORTANT: before starting any new diet, exercise, or supplement regime most Health Professionals will suggest you do a Digestive System Cleanse **FIRST!**

The ingredients in [Pure Vegan Mag O₇](#) when used collectively have been shown to help: combat the Negative effects of a Sedentary Lifestyle, Candidiasis, Fatigue, Irritable Bowel, Constipation, Diarrhea, Diverticulitis, Hemorrhoids, Environmental Toxicity, Ulcerative Colitis, and General Digestive System Health & Maintenance.

Pure Vegan Mag O₇ was created to help restore digestive system health, especially after a history of antibiotic use where the “friendly” bacteria have been killed off and the opportunistic anaerobes have taken over the digestive system. Most anaerobic bacteria can only survive in an atmosphere with little or no oxygen. Most Aerobic bacteria, by contrast, can only survive in an oxygen rich atmosphere.

Over time undigested food and waste material build up in the intestinal tract. This is a perfect breeding ground for **anaerobic bacteria**, which if left alone could cause serious health problems. Many strains of anaerobic bacteria can be harmful in our digestive system. Most anaerobic bacteria **cannot** survive in a healthy, oxygen enriched environment. **Aerobic bacteria** are the ‘GOOD’ bacteria that allow our digestive system to operate properly. This type of bacteria thrives on oxygen. When [Pure Vegan Mag O₇](#) is introduced into the digestive system, it releases Nascent (singlet) oxygen which attaches itself to both good and bad bacteria. The oxygen released helps to destroy the bad bacteria and nourish the good bacteria.

The logic behind **Pure Vegan Mag O₇** relates to the action of probiotics or the friendly bacteria, such as acidophilus, which reside in the healthy human intestine. These facultative bacteria have a unique method of protecting their territory against the encroachment of anaerobes; they secrete hydrogen peroxide. Hydrogen peroxide releases oxygen in the nascent or singlet form which is far more powerful than atmospheric oxygen. The result is a highly aerobic atmosphere which is inhospitable to anaerobes. Since many pathogens are anaerobic in nature, they cannot survive in this created aerobic atmosphere. When the peroxide (oxygen) secreting bacteria have a well established colony in the intestinal tract, it is difficult for the anaerobes to establish their own colony. The result is a healthier digestive system. Conversely, when the anaerobes have formed a well established colony, they protect their territory against encroachment by the facultative bacteria by secreting toxins. It is believed that these toxins contribute to colitis and many other intestinal diseases.

Pure Vegan MagO₇ releases Nascent (Singlet) Oxygen that has been shown to:

- Act as superior digestive system cleanser and oxygen supplement
- Fast acting, usually overnight, available in Capsules or Powder
- Proven in laboratory tests to release oxygen for over 12 hours
- The Magnesium in **Pure Vegan Mag O₇** acts as a Stool Softener for those needing this benefit
- Also the Magnesium acts as a vehicle to transport oxygen through intestinal tract, kidneys and bladder
- Diminish harmful bacteria and support friendly flora while boosting the Immune System
- Improve absorption of nutrients from foods and supplement regimes
- Enhance results from sports nutrition and weight loss products

Following a regimen of [Pure Vegan Mag O₇](#) it is advisable to take a combination of several forms of probiotic bacteria such as acidophilus, bifidos, bulgaricum, salivarius and others, to re-establish the oxygen secreting cultures.
